

INTRODUCING...

The New Dimension in Sterilization...

The SteriCUBE® Multiple Tray Sterilization System

The SteriCUBE® System is a patented, 100% green, multi-tray sterilization system that eliminates the need for “blue wraps” and resultant bio-hazardous waste. After processing, the SteriCUBE® System can be rolled directly to the OR with “surgery-ready” instruments without delay or stored up to 30 days without contamination. This progressive multi-tray delivery solution results in “3 new dimensions” of sterilization: increased **Patient Safety**, improved **Productivity**, and **Cost Savings**. Simply put, these are our *Steri³ Advantages*.

- 1. PATIENT SAFETY** – Patented multiple tray sterilization system dramatically lowers risk of failure, surgery delay, and undetected instrument contamination
 - No holes in wrap, wetpacks or contaminated trays that need to be re-sterilized
 - All 12 “surgery-ready” instrument trays can be grouped together and stored for up to 30 days
- 2. PRODUCTIVITY** – Elimination of “blue wrap” greatly reduces tray prep and processing time as well as freeing up the OR nurse to tend to the patient rather than looking for holes in wraps
 - Estimates are that 10% (or more) instrument trays are rejected for tears, holes, wetpacks or lost/misplaced contents. This risk is virtually eliminated using the SteriCUBE™ System
 - Confidence in 100% SteriCUBE® sterility maintenance results in faster case start times as well as increased surgeon and staff satisfaction
- 3. COST SAVINGS*** – Elimination of “blue wrap” also results in huge cost savings from its first use.
 - Dramatically reduces costs associated with materials and labor including wraps, corner protection, linen, individual rigid containers, overtime expense, bio-hazardous waste, workers comp injury
 - Increase throughput by eliminating multiple steps in CS/SPD and the OR

HERE'S WHAT OUR HOSPITAL PARTNERS ARE SAYING ABOUT The SteriCUBE® System and its Steri³ Advantages:

PATIENT SAFETY -

"We have been able to reduce set up time in the OR down to 2 minutes and 18 seconds from our average of 30 minutes."

- Maryellen Fortenberry, PREZIO

"I don't know how we ever did it without them."

- Robbi Yiengst, Fawcett Memorial

PRODUCTIVITY -

"We can fit an extra case in each OR every day... that's how much time we save up there. I feel like I am helping hundreds of patients get their surgery done sooner so they don't have to wait as long. It's a great feeling."

- Brent Doherty, FL Hospital - Altamonte Springs

"We would be lost without them. Now we can get all the stuff done that nobody ever had time to do before."

- Jeanie Hunt, Sky Lakes Medical Center

COST SAVINGS -

"It has greatly decreased the amount of time and staff needed when having to wrap the loaner trays... It is effective and efficient..."

- LaShawna Foster, St. Joseph's Hospital
